# Dev Gems Demo: rspec-rails

# Gemfile Recap

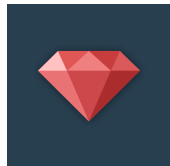

```
group :development, :test do
  gem 'better_errors'
  gem 'capybara-webkit'
  gem 'factory_girl_rails'
  gem 'ffaker'
  gem 'database_cleaner'
  gem 'letter_opener'
  gem 'rspec-rails'
  gem 'pry'
  gem 'pry-nav'
  gem 'pry-rails', '~> 0.3.2'
  gem 'simple_bdd'
  gem 'shoulda-matchers'
  gem 'spring'
end
```

# rspec-rails

*Installs Rspec especially for Rails with a generator to  
create necessary files*

<https://github.com/rspec/rspec-rails>

# Setup

```
$ rails generate rspec:install
```

```
/spec/rails_helper.rb
```

```
require 'rspec/rails'
```

# Home Spec

Create “features” folder in /spec

Create “home\_spec.rb” in /spec/features

```
require 'rails_helper'
```

```
feature "visiting the homepage" do
```

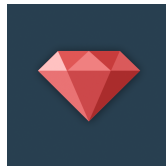

```
  scenario "the visitor sees welcome text" do
```

```
    visit root_path
```

```
    expect(page).to have_text("Welcome to RubyThursday")
```

```
  end
```

```
end
```

# Running Specs

Run all specs

```
$ rspec
```

Run all in folder

```
$ rspec spec/models
```

Run one spec

```
$ rspec spec/features/home_spec.rb
```

# Red, Green, Refactor

Create Home controller with Index method

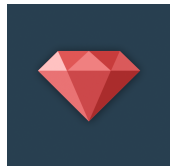

```
$ rails g controller Home index
```

Edit /config/routes.rb

```
root 'home#index'
```

Edit /app/views/home/index.html

```
<p> Welcome to RubyThursday </p>
```
