

Want To Code Along?

1. Rails app created
2. RSpec installed and set up
3. Simple BDD installed and set up

Check out these videos...

DEV GEMS DEMO: rspec-rails

Host: Melissa Wahnish

Ruby Snack #4

Testing an Admin Feature
with simple_bdd

Hosted By: Melissa Wahnish

Nested Forms

Nested Forms allow you to create a parent and child objects in the same form. This makes the user experience better by reducing the number of forms and takes advantage of Active Record Associations.

http://guides.rubyonrails.org/form_helpers.html#building-complex-forms
http://guides.rubyonrails.org/association_basics.html

Starship Spec:

/spec/features/starship_spec.rb

```
require 'rails_helper'

feature "Starship with Crew Members" do
  #communicate purpose upfront with Simple BDD
  scenario "visitor can create starship with crew members" do
    Given "visitor can view new starship form"
    When "visitor enters information for starship and crew members"
    Then "visitor can see starship listing"
  end
  #define methods from scenario
  def visitor_can_view_new_starship_form
    visit new_starship_path
    expect(page).to have_content("New Starship")
  end
  def visitor_enters_information_for_starship_and_crew_members
    enter_starship_info
    enter_crew_members_info
    click_button "Create Starship"
  end
end
```

Starship Spec(cont.): `/spec/features/starship_spec.rb`

```
def visitor_can_see_starship_listing
  expect(page).to have_content("USS Enterprise (NCC-1701-A)")
  expect(page).to have_content("James T. Kirk")
end

#define additional methods
def enter_starship_info
  fill_in("starship[name]", with: "USS Enterprise (NCC-1701-A)")
end

def enter_crew_members_info
  fill_in("starship[crew_members_attributes[0][name]", with: "James T. Kirk")
  select('Command', :from => "starship[crew_members_attributes[0][division]")
  fill_in("starship[crew_members_attributes[1][name]", with: "Spock")
  select('Science', :from => "starship[crew_members_attributes[1][division]")
  fill_in("starship[crew_members_attributes[2][name]", with: "Leonard McCoy")
  select('Engineering', :from => "starship[crew_members_attributes[0][division]")
end

end
```
